## **Fittings and parts checklist**

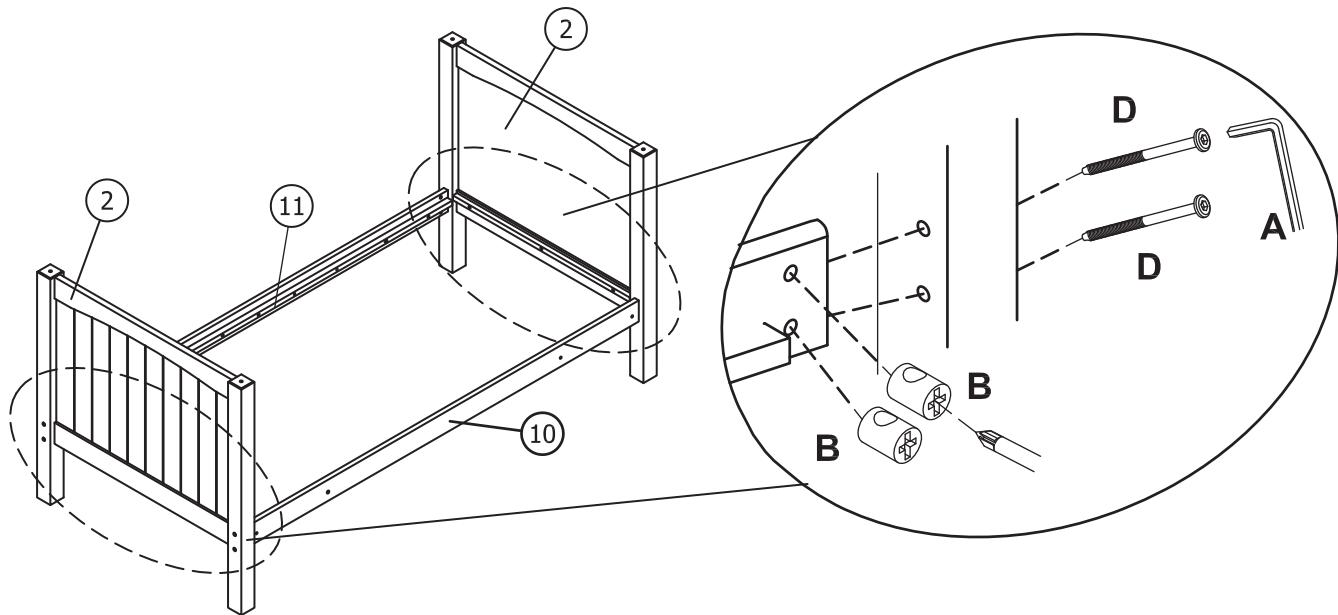

---

# IMPORTANT! PLEASE KEEP THESE INSTRUCTIONS FOR FUTURE REFERENCE

## Step 1

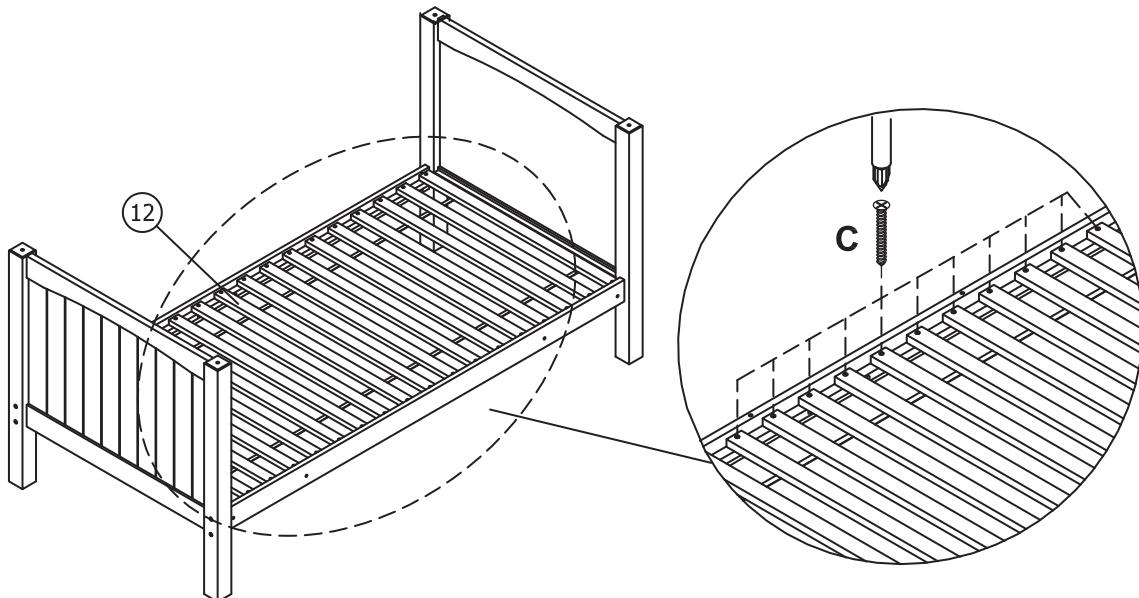

Insert Barrel Nut (B) into the Side Rail Bottom Front (10) and Side Rail Bottom Back (11). Attach the Headboard Bottom (2) using Bolt M6 x 100mm (D) and tighten using Allen Key M4 (A). Repeat this process at each end of the bed as shown in the diagram below.

**Please Note:** One of the bottom Side Rails (10) and one of the Top Side Rails (8) have additional pre-drilled holes for the Ladder to bed attached meaning the **Ladders can be placed on either end of the bed** so you need to decide the positioning before starting to assemble the bed.

## Step 2

Starting at one of the bed, secure the first fitted slat into place using Screw (C). Next, secure the fitted slat to the other end and secure using Screw (C) ensuring that there are no gaps between the slats and the Headboards. Finally secure the rest of the slats into place using Screw (C) as shown in the diagram below using a Phillips Head Screwdriver.

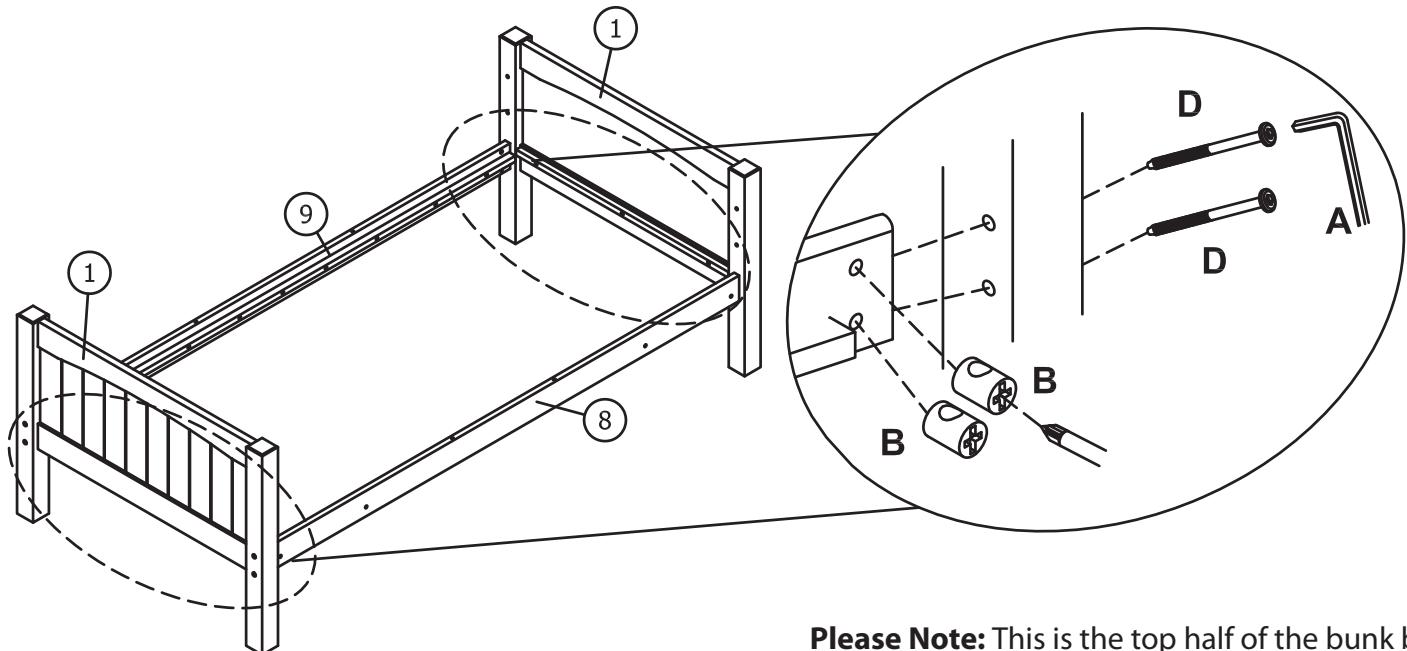

**Please Note:** The slats at each end have been cut to allow them to sit flush with NO GAPS between the headboard and slats.

# **IMPORTANT! PLEASE KEEP THESE INSTRUCTIONS FOR FUTURE REFERENCE**

## **Step 3**

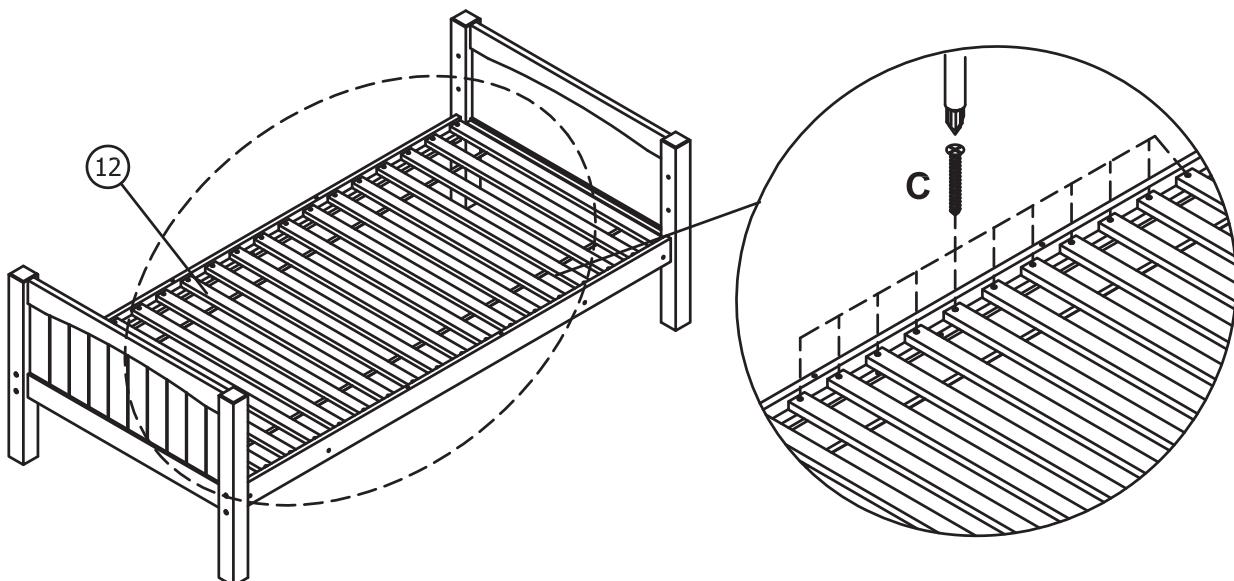

Insert Barrel Nut (B) into the Side Rail Top Front (8) and Side Top Back (9). Attach To the 2 Headboard Top (1) using Bolt M6 x 100mm (D) and tighten using a Phillips Head Screwdriver as shown in the diagram below. Repeat this process at each end of the bed as shown below.

**Please Note:** This is the top half of the bunk bed

## **Step 4**

Starting at one end of the bed, secure the first fitted slat into place using Screw (C). Next secure the fitted slat to the other end of the bed using Screw (C) ensuring that there are no gaps between the slats and headboard. Finally secure the rest of the slats into place using Screw (C) and a Philips Head Screwdriver as shown in the diagram below.

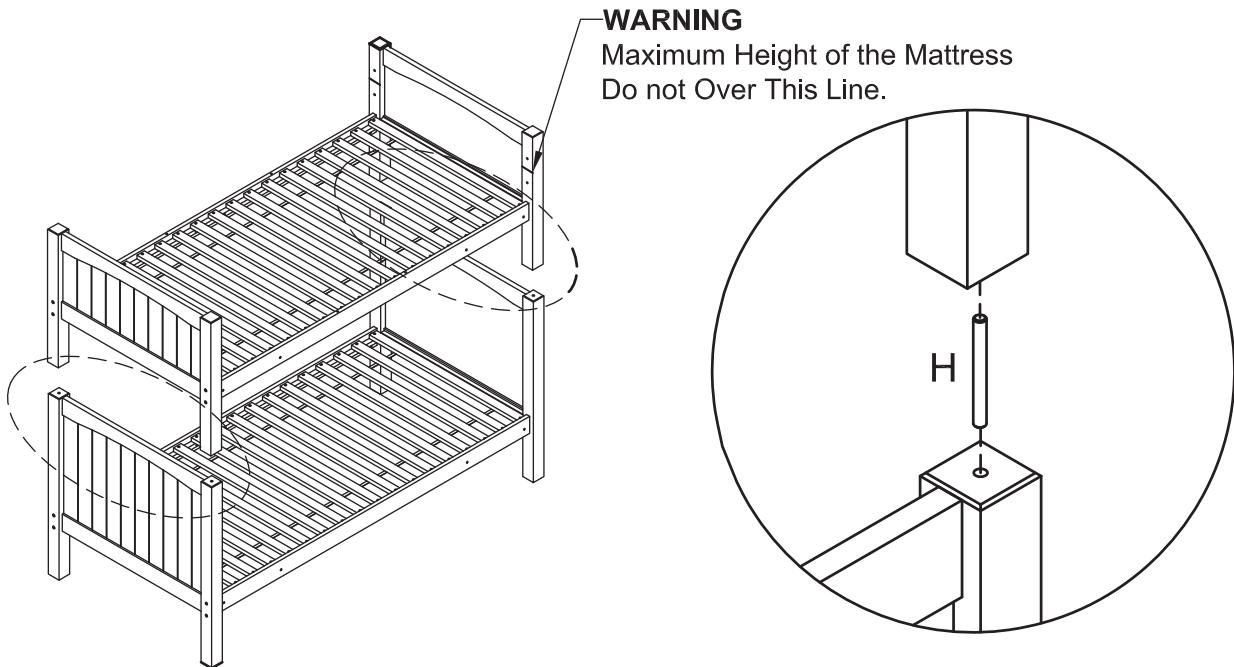

**Please Note:** The slats at each end have been cut to allow them to sit flush with NO GAPS between the headboard and slats.

# IMPORTANT! PLEASE KEEP THESE INSTRUCTIONS FOR FUTURE REFERENCE

## Step 5

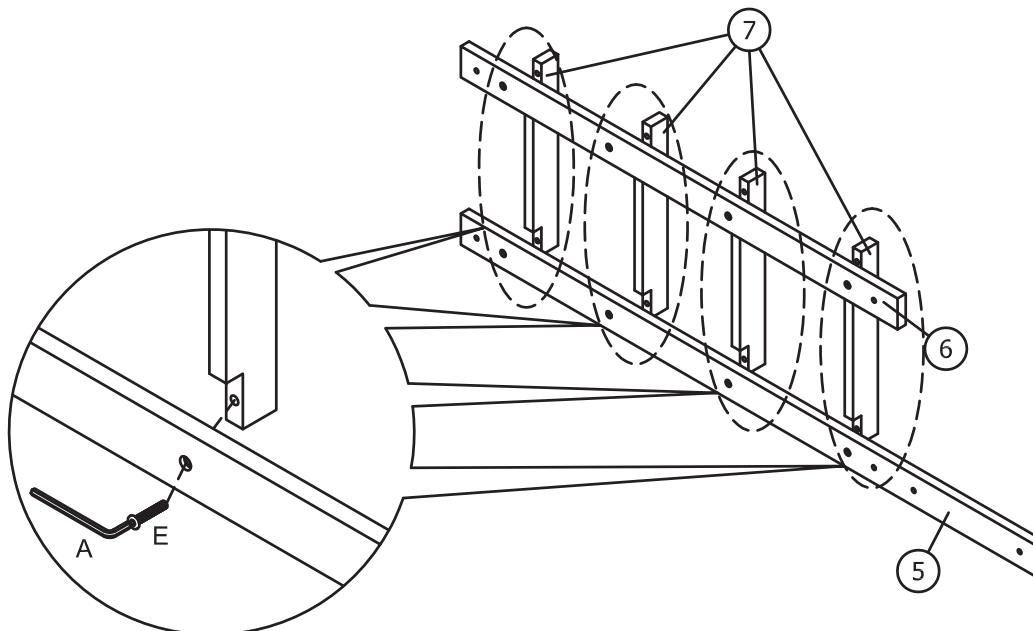

To join the upper bed to the bottom bed insert a Steel Pin (H) into the top four corner posts of the bottom bed, carefully lift upper bed structure and gently lower onto the Steel Pin (H) as shown in the diagram below.

**Please Note:** The grooved lines indicate the point in which the mattress should not exceed. The maximum height of the mattress for this bunk is 19cm. Recommended size is: L: 190cm x W: 90cm x H: 19cm (max).

## Step 6

Attach Ladder Horizontal (7) to the Ladder Long (5) using bolt M6 x 40mm (E) and tighten using Allen Key M4 (A). Repeat this step to attach the Ladder Short (6) to the Ladder Horizontal (7).

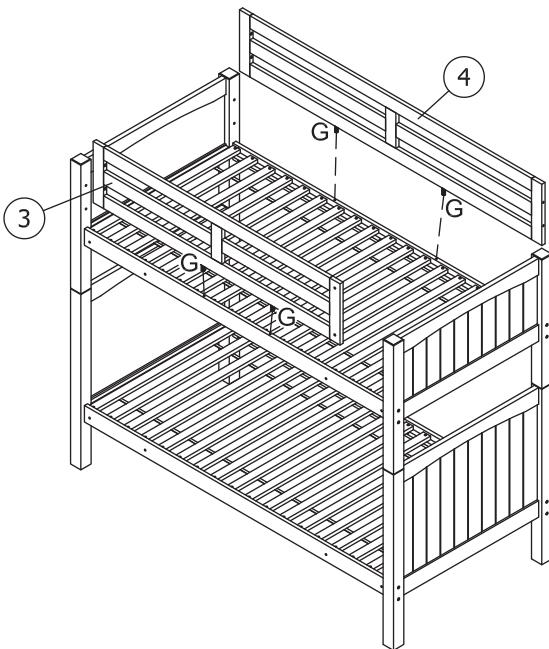

**Please Note:** The ladders can be placed either side of the bunk, choose which side you want the ladders before attaching the Side Rail.

# IMPORTANT! PLEASE KEEP THESE INSTRUCTIONS FOR FUTURE REFERENCE

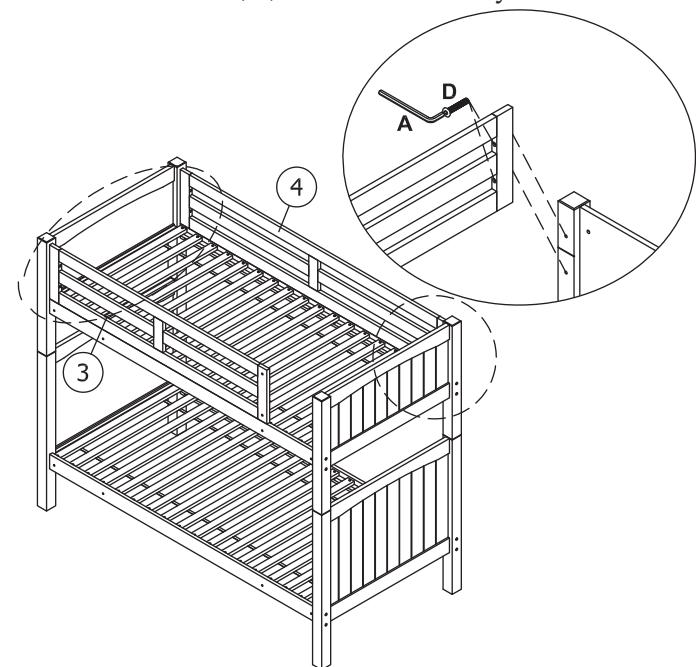

## Step 7

Insert Dowel M8 x 30mm (G) into the bottom of the Short Guard Rail (3) and Long Guard Rail (4). Then attach the Rails (3) and (4) to Side Rail Top Back (8) and Short Guard Rail (3) using the holes for the Dowels as a guide.

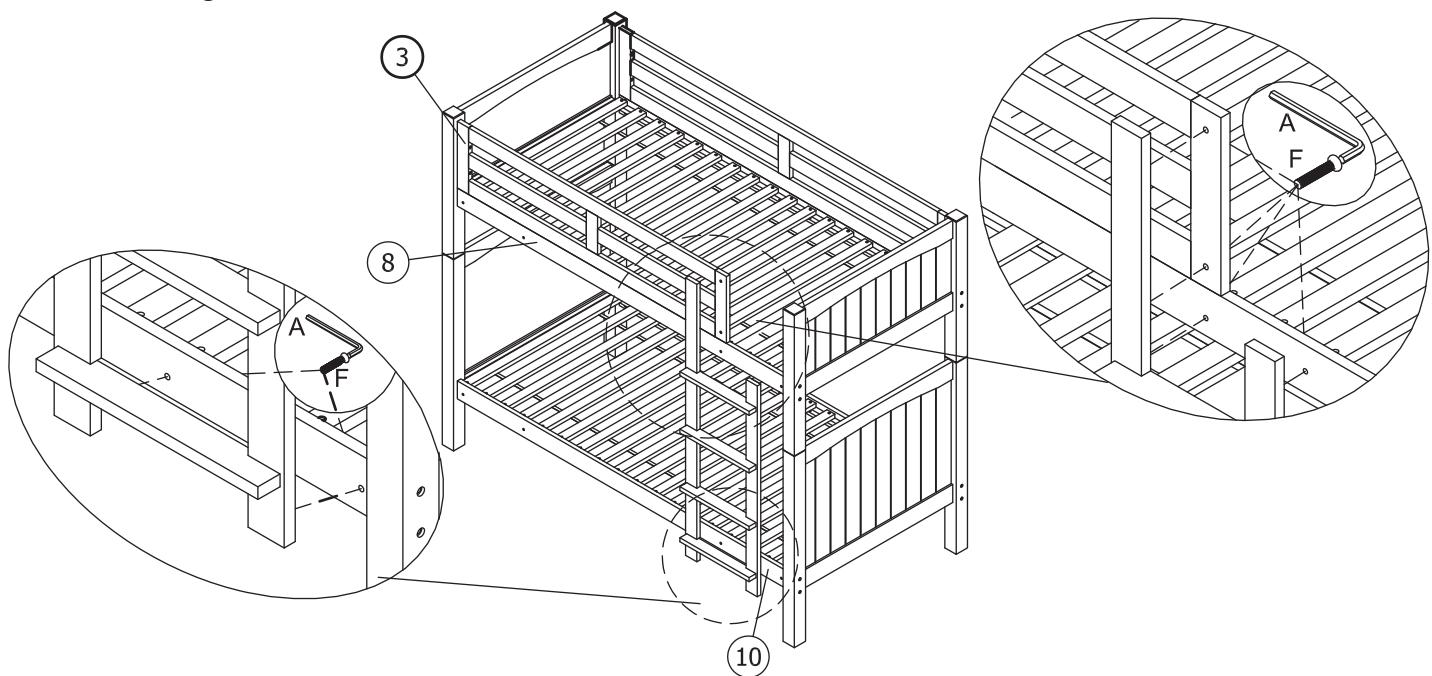

## Step 8

Secure the Long Guard Rail (4) using bolt M6 x 100mm (D) to both Headboard Tops (1) and tighten using Allen Key M4 (A). Then secure the Short Guard Rail (3) to Headboard Top (1) using bolt M6 x 100mm (D) to one side only.

## Step 9

Attach assembled Ladder Unit to the Short Guard Rail (3), Side Rail Top Front (8) and Side Rail Bottom Front (10). Secure the Ladder Unit using bolt M6 x 30mm (F) and tighten using Allen Key M4 (A) as shown in the diagram below.

Please ensure all fittings are securely tightened before use.

**WARNING:** Children can become trapped between the bed and the wall. To avoid risk of serious injury the distance between the wall and the top safety barrier should be less than 75mm or more than 230mm.

## **Care and Maintenance**

---

### **Wood Furniture**

Wood displays different grain patterns depending on which way they are cut - for example, 'the medullary ray' which can appear on oak furniture as a mark of good quality timber - these are just characteristics of the natural beauty of the wood. Some furniture is also deliberately aged and rustic.

Wood veneers also allow distinctive patterns to be created on flat surfaces, such as table tops and drawer fronts by the way the slivers are arranged.

All timber surfaces will change colour and mellow over time. New furniture will initially vary in shade from items that have been previously purchased.

### **How to care for your wood furniture**

Furniture with a hard laquer, wax polish or painted surface should be dusted with a dry cloth.

Waxed furniture will need to be given a coat of beeswax a couple of times a year to help maintain its luster.

Spray polishes are best avoided as they contain silicones which may spoil the furniture by building up over time.

Our furniture will endure most temperatures in the home but it is best to avoid placing furniture next to heat sources such as radiators or fires. Be particularly careful with solid wood as the lack of humidity caused by central heating can cause damage such as warping.

---

## **Safety Instructions**

---

Never drag furniture when moving it, always lift it.

Periodically check all fixings to ensure none have come loose and re-tighten where necessary.

Please take care when handling or moving the furniture as careless handling may cause damage or injury. Furniture can be dangerous if incorrectly installed. Assembly should be carried out by a competent adult. No liability will be accepted for damage or injury caused by incorrectly installed or assembled furniture. During assembly children should be kept away from the product due to possible risk of injury. Do not use this item if any components are missing or damaged.

It is recommended that before moving heavy objects to a new location they are completely dis-assembled to avoid personal injury or damage to the furniture. Please be careful to retain all fittings when doing this.

**This product is suitable for children aged 3 - 12 years.**

**The maximum weight or load for this product is 70kg.**

This product complies with BS EN 747:2007 and Entrapment Hazard Safety Regulations 1987.

If you require any additional information or have any issues with this product please call the John Lewis helpline on 01244 689949 or email [mail@fwgroup-uk.com](mailto:mail@fwgroup-uk.com)
