

Trade-in any vacuum and receive money off a Dyson upright or cylinder machine.

Conventional vacuums with bags clog and lose suction. Dyson upright and cylinder vacuums are different. Patented cyclone technology spins dirty air at high speeds, flinging microscopic particles out of the airflow and into the bin. There's no bag, so there's no loss of suction.

From 18th March to 7th May, you can trade-in your old vacuum cleaner of any make and get money off a brand new Dyson upright or cylinder machine. The trade-in offer is available at all participating John Lewis stores and through our website.

All Dyson upright and cylinder vacuums come with a free 5-year guarantee – parts and labour. And because they have lifetime washable filters and there are no bags to buy, there are no extra costs.

Terms and conditions:

The offer is only available if the customer agrees to dispose of an old vacuum cleaner he or she already owns by entering the promotional code, and bringing their old vacuum cleaner to the small electrical department next time they visit a John Lewis store.

If the customer wishes to return the product, only the discounted price paid will be refunded and the old vacuum will not be returned. Also available in John Lewis shops. Offer ends 7th May 2013.
